PyroUSB 2.2

PC Configurable Infrared Temperature Sensor for Demanding Applications

- Short-wavelength measurement for lowemissivity targets such as steel rollers and other metal surfaces, even at low temperatures
- Configurable temperature range, emissivity setting etc. from a PC via CalexSoft software and USB cable (supplied)
- Features max, min, average and instantaneous readings; peak or valley hold; reflected energy compensation
- OPC Server capabilities
- Temperature ranges from 45°C to 2000°C
- Emissivity: 0.1 to 1.0
- Stainless steel housing, sealed to IP65
- Field of view: 15:1, 25:1, 75:1 or Close Focus
- Selectable 0 to 20 mA or 4 to 20 mA output
- Optional air/water cooled housing, air purge collar, laser sighting tool and mounting brackets

The selectable 0 to 20 mA or 4 to 20 mA output is compatible with almost any indicator, controller, recorder, data logger etc. without the need for special interfacing or signal conditioning.

Models with temperature range 45°C to 300°C, or 100°C to 400°C have 15:1 optics.

For models with temperature range 250°C to 1000°C, or 450°C to 2000°C, a choice of optics is available:

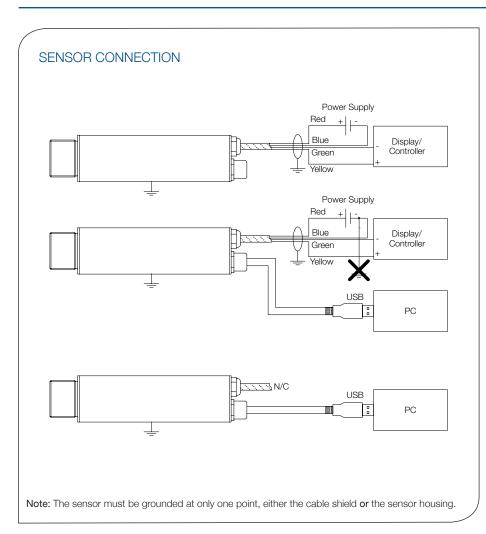

PU251-2.2 models have 25:1 optics and are suitable for most target sizes and distances.

PU751-2.2 models are specially designed for distant targets and have an optical resolution of 75:1.

PUCF-2.2 models are designed for small targets and measure a spot size of ø 7.5 mm at 500 mm distance.

All PyroUSB 2.2 Series sensors are fully configurable from a PC using the CalexSoft software and USB cable supplied. This user-friendly software enables the user to set the temperature range and emissivity setting, compensate for reflected energy; apply filtering; select max, min, average or instantaneous readings; and configure peak or valley hold processing. These features can also be monitored and adjusted by an OPC Client. Other features include data acquisition, alarms and a scrolling graphical display.

The sensor will operate with either the 4 to 20 mA cable connected, the USB cable connected, or both. The USB cable has an IP65 connector at the sensor end. An IP65 cap protects the sensor when the USB cable is not connected.

GENERAL SPECIFICATIONS

Temperature Range	LT: 45°C* to 300°C (PU151LT2.2 only) PT: 100°C to 400°C (PU151PT2.2 only) MT: 250°C to 1000°C
Field-of-View	HT: 450°C to 2000°C 15:1 (PU151LT or PT) 25:1 (PU251MT or HT) 75:1 (PU751MT or HT) ø7.5mm @ 500mm (PUCFMT or HT)
Output	Selectable 4 to 20 mA or 0 to 20 mA (linear with temperature) Via PC port conforming to USB 2.0
Configuration	
Accuracy *	$\pm 1\%$ of reading or $\pm 2^{\circ}$ C, whichever is greater
Repeatability *	$\pm 0.5\%$ of reading or ± 0.5 °C, whichever is greater 0.1 to 1.0
Emissivity Setting	≥240 ms (90% response)
Response Time, t ₉₀	2.0 to 2.4 µm
Spectral Range	24 V DC (26 V DC max)
Supply Voltage	11 V DC min
Sensor Voltage	900 Ω @ 24 V DC
Max Loop Impedance	Full temperature range (up to 1550°C)
Maximum Span	100°C
Minimum Span * Object temperature > T _{min} (see graph of Minimum Measurable Temperature)

ACCESSORIES

FIXED AND ADJUSTABLE MOUNTING BRACKETS

AIR PURGE COLLAR

The air purge collar is used to keep dust, fumes, moisture and other contaminants away from the lens.

AIR/WATER COOLED HOUSING

The air/water cooled housing allows the sensor to withstand ambient tempera-

tures which exceed the normal 70°C limit. Air or water (depending on the degree of cooling required) flows into one of the fittings on the side and out of the other. To prevent condensation forming on the lens, the air/ water cooled housing is supplied complete with an air purge collar. Please note, the air/water cooled housing must be ordered with the sensor and cannot be fitted by the user.

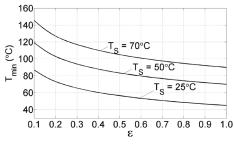

LASER SIGHTING TOOL

The Laser Sighting Tool screws onto the front of the sensor during installation and

indicates precisely where the sensor is aiming. Once the sensor has been aimed at the centre of the target and locked in position the Laser Sighting Tool can be removed. The laser is activated by means of a push button on the front of the tool which has a latching

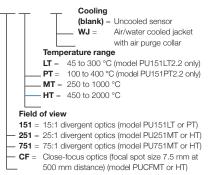

MINIMUM MEASURABLE TEMPERATURE (PU151LT2.2 only)

temperature (T $_{min}$), determined by surface emissivity (s) and sensor temperature (T_S).
