

REMOTE CONTROL VIA GSM

Designed for the remote control of PLCs, the MGi196 GSM modem permits data transmission at a rate of 9600 b/s via the GSM network.

Equipped with the latest GSM technology, it is compatible with all GSM networks (900-1800-1900 MHz) and also most PLCs.

Characteristics

- 900-1800-1900 MHz GSM networks
- 3 digital inputs for data call or SMS
- RS232 / RS485 / RS422
- Audio interface
- DIN rail mounting

Applications

Automation networks

MGi196 GSM 900 - 1800 MHz Modem

Remote control

The MGi196 facilitates the creation of remote control systems :

The three call contacts allow you to simply establish communication and send programmable SMS text messages. The RS232-RS485-RS422 interface permits you to directly connect the modem to the PLC.

Characteristics

Features	Data SMS text messages Audio communications
Size	115 x 38 x 97 mm (h, l, p)
E.M.I.	EN50082-2
Electrical safety	EN 60950
Power requirements	9 to 30 VDC
24 VDC power Consumption	Average : 150 mA Peak : 300 mA
Operating Temperature	0° / +60°C
GSM Network	GSM 900 MHz and DCS 1800-1900 MHz networks
Interfaces	RS232 and RS485 and RS422 (four wires) Audio interface for external microphone and speaker 3 digital inputs / 1 digital output
Error Correction	V42
Serial interface	300 to 19200 b/s 7-8 bits Parity : N / E / O, 1 start, 1-2 stops
Call Commands	■ AT commands (Hayes) ■ 3 digital inputs for data calls and sms
